

Ch. Skansen's Union Jack

Skansen Kennel

Pedigree Information

Biography

Jack was born February 19, 1996. He finished his Championship at one year old - that's when this picture was taken. It is very difficult to finish a P/S in the US, and especially a young P/S male, so you can imagine his quality to do this - almost finished unbeaten - like his dad Ch. Skansen's Park Ave.

Jack is very tall - big body - beautiful P/S color with plenty of furnishings. He has an excellent top line, tail set and can out move any dog in the ring with his strong, powerful gait. His sire is the No.1 stud dog world wide in this color Giant and we expect Jack to follow in his footsteps. Jack's mother, Skansen's Earthquake Baby, was brought into our breeding stock so we could get some outcross bloodlines - which is difficult in this color - the gene pool being so small. Earthquake or "Brenda" as we call her, was born in Los Angeles and lived through

the horrible earthquake of 1994, that's how she got her name. Brenda is big, excellent character and this litter was superb. Jack will be taking his dad's place as our main P/S stud dog now that Park will retire soon. He is a carbon copy of his dad - but much bigger. He has a very extrovert temperament.
